Detailed Action

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: After a careful review of Applicant's arguments and the rule 132 affidavit filed 10-10-2003, the Examiner agrees that Applicant's article defines a novel article. The prior art combination of Chakrabarti et al and Peters fails to teach the use of a compressed foam. Applicant has shown that a compressed foam prepared in accordance with the teachings of the present invention has properties vastly different than an uncompressed foam prepared in accordance with the teachings of Peters. In particular, Applicant's compressed foam is significantly denser, has different values for stretch and recovery and has different porosity. It would not have been obvious to one of ordinary skill to have utilized a compressed foam for the art combination taught by Chakrabarti et al and Peters without the use of hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
